## Au

AuditAdvanced

*Paperless tools for advanced audit automation,
for shorter, faster, risk-focused audits*

Raise efficiency by up to 50% with advanced audit automation

Plan and conduct audits faster with confidence that your audit has been tailored effectively using CaseWare's unique audit optimiser. Review engagements more quickly and accurately through the colour coded dashboard and comprehensive reports.

- Complete digital audit trail
- Review notes, risks and issues collated in easy to read reports
- Year on year roll forward features
- Automated sampling and management letters
- Integrated document management system

The next generation of audit software

It's Powerful & Fast

CaseWare's audit solution enables you to plan and conduct audits faster, and has been reported to raise efficiency by up to 50%.

View, Store & Exchange

Simply manage client documents and communicate with teams and clients via our cloud client portal.

It's Compliant & Flexible

Use Mercia or HAT methodologies or build tailored firm or industry-specific procedures.
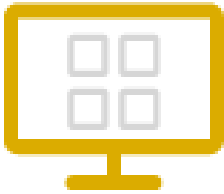

It's Integrated

Experience one streamlined process when using CaseWare AccountsAdvanced and Corporation tax. Collaborate with colleagues faster when integrating with CaseWare SmartSync.

It's Trusted

Practices of all sizes use CaseWare from sole practitioners to 3 of the 'Big Four' top accountancy practices, and over 50% of the top 75.

Key Features

Interactive digital dashboard
Designed to give you a clear picture of the audit assignment progress, using colour coding and document grouping.
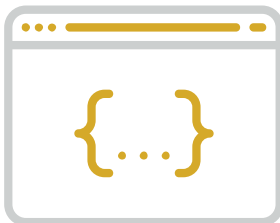

Audit Optimisation
Assignment optimisation features allow you to remove content using our tailoring checklist.

Risk logging and reporting
Users can raise audit risks and link them to other parts of the file. Risk reports can be produced to display a variety of risk properties.

Internal Controls
Similar to risks, users can easily log information on internal controls and processes using a specifically designed tool.

Automated management letters
Our AuditAdvanced solution contains management letters that draw from information reported during the assignment.

Issue logging
Our issues tool will allow users to log review points and other notes and queries and assign them to documents or specific procedures.

Review features
AuditAdvanced includes various review tools to help the review process. New content, amended content and even deleted content can be highlighted on request.

RI review assistance
Our digital dashboard includes special areas designed to focus on schedules that are intended for special consideration and sign off by the responsible individual.
